Elisabeth "Beth" Oliver, Brooke Dalton

Document Name: Sprint 2 Report

Sprint 2 Completion Date: 2/18/2018

Revision Number: 1.2

Revision Date: -

Actions to Stop Doing

Not communicating as often - Communication has been a bit spotty. We talk after class, giving a brief overview of what we have been doing. We would like to improve in this area.

Actions to Start Doing

Using the scrum board more - We believe that making greater use of the scrum board will help us better organize ourselves even when not working together in person. It should help us determine what needs to be done and who is working on what so we don't step on each other's toes as much.

Meeting up more often - Occasionally make plans to meet up and work together as a group but have not been doing so.

Actions to Keep Doing

Group meetings - The most work that we did this sprint was in group meetings. It was very helpful to work together in person. We should strive to have more of these in the coming sprints.

Work completion rate

Two of the three user stories were completed this sprint, resulting in around 30 hours of work. We had estimated 35.5. This difference is more to do with us tweaking previous tasks to make them better. With 14 days in the sprint, this implies a little over 2 hours a day.
